

NAREN S J

Mangaluru, Karnataka, India | Phone: +91 82968 33381 | Email: narensonu1520@gmail.com
Portfolio: narensj.netlify.app | LinkedIn: linkedin.com/in/narensj20 | GitHub: github.com/Naren1520

EXPERIENCE

Datavex AI

Sep 2026 – Present

AI Engineering Intern, Mangalore, Karnataka

- Contributed to an AI-powered **2D-to-3D CAD reconstruction pipeline**, using **Gemini Vision**, **FastAPI**, and **OpenCascade** to transform engineering blueprints into parametric 3D models.
- Developed an **AI-driven virtual interviewer** that autonomously conducts interviews, generates **resume- and requirement-based questions**, performs real-time candidate detection and analysis .

Sahynex Tech Solutions

Oct 2025 – Aug 2026

Software Developer Intern, Mangalore, Karnataka

- Architected and deployed **10K+ user** full-stack platforms, building scalable **RESTful APIs** and secure authentication infrastructure to support reliable production workloads and seamless user experiences.
- Implemented scalable **frontend and backend features**, integrating APIs and services for **production deployments**.

ISDC - Innovex Student Developer Community

Sep 2025 – Present

Technical Head (Promoted from Web Development Lead, Feb 2026), Mangalore, Karnataka

- Led architecture and engineering execution across **10+ production-grade platforms**, driving **system design**, **scalability**, **code quality**, and **deployment strategy** while establishing engineering standards across development teams.
- Mentored and managed a team of developers, conducted **technical interviews**, organized **workshops**, led **client meetings**, and structured **peer reviews** to maintain engineering standards and ensure successful project delivery.

PROJECTS

• SPManger 🔗

Next.js, Cloudflare R2, MongoDB, Docker, Kubernetes, Github API, Socket.io, Redis

- Engineered an **AI-native SDLC platform** that transforms requirements into **architecture**, **API/ER models**, **engineering tasks**, and **developer assignments**, accelerating software planning and execution.
- Built **agentic RAG pipelines** for requirement reasoning and project-context retrieval, enabling automated task decomposition, skill-based allocation, and continuous project replanning.
- Automated the development lifecycle with **GitHub**, **AI code reviews**, **testing**, **CI/CD**, **Redis**, **Socket.io**, **Docker**, and **Kubernetes**, enabling scalable real-time collaboration from planning to deployment.

• VoteStack 🔗

C++, PostgreSQL, Redis, Docker, nginx, Prometheus

- Engineered a high-performance C++ online voting platform using **epoll**, thread pools, and non-blocking I/O.
- Architected scalable infrastructure utilizing **Nginx** load balancing, **Redis** caching and Prometheus-Grafana.
- Implemented **PBKDF2-SHA256** auth, Redis sessions, and atomic transactions preventing duplicate voting.
- Optimized throughput and achieved low latency using connection pooling, rate limiting and async processing.

• CRIMSON 🔗

Next.js, FastAPI, MongoDB, Python, AI/ML, Neo4j, Docker

- Built an **AI-powered criminal intelligence platform** integrating **FIR/case management**, **entity extraction**, **network analysis**, **GIS**, and **anomaly detection** for investigative workflows.
- Engineered **graph-based intelligence** to uncover relationships across suspects, organizations, cases, locations, and activities using centrality, community detection, and path analysis.
- Integrated **RAG-based AI insights**, **risk analysis**, and **interactive network/geographic dashboards** with **8-tier RBAC** and **immutable audit logging** for secure investigative analysis.

RESEARCH

Cryptographic Offline Payment Protocols & Chip Architecture

Ongoing

- Developing a secure token-verification scheme to prevent double-spending in **offline P2P transactions**.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, C/C++.
- **Frameworks & Runtime:** React.js, Next.js, Node.js, Express.js, Tailwind CSS, Socket.IO.
- **Databases & Cloud:** MongoDB, PostgreSQL, MySQL, Firebase, Redis, Azure, Cloudflare R2, Supabase.
- **Tools:** Linux, Git, Docker, Kubernetes, Postman, Figma, Render, Railway, Grafana, Prometheus, n8n.

EDUCATION

Sahyadri College of Engineering and Management

Oct 2024 – Present

Bachelors in Information Science Engineering, Mangaluru, Karnataka

(Expected Graduation: 2028)

- **Relevant Coursework:** DSA, DBMS, OOPs, OS, Computer Networks, Information Storage Management.

ACHIEVEMENTS

Winner — HackHarbor 3.0 | Winner — GDG TechSprint | Finalist — BuildForBillion (Incub8) | Finalist — AWS AI Prompt Challenge | Semi-Finalist — EY Techathon 6.0, India | Best Innovative project award - Versathon 1.0. | 2× SIH College Finalist
